GEORGIA — Two Georgia counties using the same electronic voting software as a **Michigan county that experienced a glitch** have also reported encountering glitches during the 2020 election.

Voting machines crashed in Georgia's Spalding and Morgan Counties on Tuesday morning because of

a Politico.

"That is something that they don't ever do. I've never seen them update anything the day before the election," said Marcia Ridley, elections supervisor at Spalding County Board of Election.

Ridley added that she did not know what the upload contained.

■ **MICHIGAN SOFTWARE GLITCH TALLIES THOUSANDS OF REPUBLICAN VOTES AS DEMOCRAT, GOP CHAIRWOMAN SAYS**

The report said that the Georgia counties used software made by Dominion Voting Systems — the same software used in most Michigan counties, according to the [Detroit Free Press](#).

Dominion Voting Systems is also used in Michigan's Antrim County, the [Detroit Free Press](#) reported.

In Antrim County, a glitch caused about 6,000 Michigan ballots that were meant for Republican candidates to be wrongly counted for Democrats, Michigan Republican Party chairwoman Laura Cox said. Moreover, the GOP leader added that 47 other counties in Michigan used the same software that experienced the reported glitch.

The glitch, which "caused a miscalculation of the votes" in Antrim County, was so detrimental that it had actually caused the county to flip blue in favor of Joe Biden. The presidential election results have since [been corrected](#), flipping the county back from Biden to President Donald Trump.

On Friday, a Republican county official in Michigan's Oakland County said he found out that he won reelection in a race he initially thought was lost, because a computer glitch was fixed, [Breitbart reported](#).

Honestly, stop whining and get off the pot. Really, let the recounts happen and deal with the results. I do think the elf on the shelf was observing the absentee ballots being counted. But, and I do mean but; if the recounts reveal the same votes for the win for Biden, what will Donald do?

Two Georgia counties using the same software of Michigan counties encounter software glitches. Law Officer
So the story says they found an error and corrected it by moving
6,000 votes back from Biden to Trump. Trump still loses. Done. If
they found more errors, they would have fixed them to.

David James

Hmm, multiply 6000 by 47 counties that had the same
"glitch." Biden still wins? Nah. You refuse to accept the fact
that the "glitches" aren't. They're deliberate, premeditated
attempts to steal votes.

What's happens if Joe Biden is impeached for colluding with the
Russians & Chinese

Like · Reply · 7 · 3d

Jeff Iantello

You mean "arrested"... he would have to be president to be
impeached.

Republicans in House and Senate give Biden nothing he wants,
Vote no to every resolution bill whatever they send thru the house, or
senate give Biden a Stalemate Presidency!!! Don't cooperate in any
way what so ever... Let American Peoples voices be heard Loud and
clear he not what we wanted... Make his 4 years hell in the white
house, try to Impeach him every chance you can get... Then
Impeach the Vice President. Never Give up just like dems did to
Trump!!! Take many long Vacations just like the Democrats did.

Ramona Maglone

Bjorn Olson she has to be returned as head of house first I
don't see that happening thank God

Like · Reply · 2d

Michael Reynolds

So, will anything actually be done to correct this via a recount? Is it
possible that the dems knew all along that Biden "was sure to win..."
so they kept him in the basement?

Regardless if it is human error or machine it is still a fraud.

told....someone had to code to count the way it did.....this is a software thing

Like · Reply · 4 · 3d

Steve Brown

Bjorn Olson If programmed to do so intentionally it would be and that is probably how it happened.

Turns out it was human error, not a software glitch. So sorry, Trumpies. Your guy lost fair and square.

Like · Reply · 1 · 3d

Eddie Garcia

So its fraud then?

Like · Reply · 7 · 3d

Jason Bateman

Eddie Garcia No, it was involved with a software update to the ballots. Some machines had the update, while other ones didn't. When all the ballots for the counties were added together, the different fields from different updates caused an error and votes got distributed to different people. So Biden ended up getting about 6k more votes. This also happened in the highly populated suburb County of Detroit called Oakland which altered the results. Its incredibly frustrating to gather this information because either news organizations denied this happened or they didn't verify if a "bug" really did exist. The reality is somewhere in between but this means that all counties that use these voting machines must be validated that the same software updates existed in all their voting machines to definitively confirm or deny that their results are accurate.

Charlene Rose

Jason Bateman funny how on glitch was because of software update but the other was from lack of update.

Jimmy Carter warned against absentee ballots. Now that it is done, faith and trust in American voting integrity is lost. Comrade Kamala will serve warm green tea and Xanax to President Biden. The squad will get about the business of seizing power. The U.S. Govt. will be weaponized again and unleashed on President Trump. They will threaten banks that loan Trump money. Weaponize the I.R.S. and audit Trump for the last 125 years. Charge him with income tax evasion. Seize Trump businesses and put the Donald in prison. I hope President Trump understands that revenge is coming. He should seek political asylum abroad. The night of the long knives is coming. Cancel culture is unleashed. Defunding police, Antifa and BLM are at the gates. May God bless the thin blue line. Nobody has your back in the Comrade Kamala squad. Our Boy's in Blue. We do so need you !

 **Winson Thai**
Time to recount the votes. Stupid Biden hasn't really won yet.
Like · Reply · 9 · 4d

 **Holland K Smith**
Ok
146,000-6000= 140,000 votes left for Biden.
Recount complete.
